SYMBIOSIS INSTITUTE OF TECHNOLOGY, PUNE

Constituent of Symbiosis International (Deemed University), Pune

Sr. No	Description	BL	COs
1	Explain the meaning and concept of economics.	L1	CO1
2	Explain the concept of supply elasticity in Economics.	L2	CO1
3	What is Economics? Explain the concept of microeconomics.	L1	CO1
4	Explain the concept of demand elasticity.	L2	CO1
5	Define Scarcity and choice.	L1	CO1
6	Explain the meaning of Macroeconomics.	L1	CO1
7	What are the Various economic tools to handle data	L1	CO1
8	Explain the Income elasticity of demand.	L2	CO1
9	What do you mean by Decision-making in economics?	L1	CO1
10	Economic Theorizing.	L1	CO1
11	What is the Meaning of Supply in Economics?	L1	CO1
12	What is the Law of demand?	L2	CO1
13	What is scarcity? Can you think of two causes of scarcity?	L2	CO1

14	Define opportunity cost and give a real-life example.	L1	CO1
15	How does the law of demand work, and what are its key determinants?	L2	CO1
16	Describe the concept of elasticity of demand and explain its importance for businesses.	L2	CO1
17	What happens to the equilibrium price and quantity when demand and supply increase? Illustrate with a graph.	L2	CO1
18	Evaluate the role of incentives in shaping consumer and producer behaviour in the market.	L3	CO1
19	What are the 10 principles of economics as outlined by Gregory Mankiw?	L1	CO1
20	What is an example of a problem in the world today, not mentioned in the chapter, with an economic dimension?	L1	CO1
21	How does the principle "The cost of something is what you give up to get it" influence opportunity cost in policymaking?	L3	CO1
22	Examine the implications of "A country's standard of living depends on its ability to produce goods and services" for developing economies.	L3	CO1
23	In a world of scarce resources, to what extent should governments prioritise economic efficiency over equity?	L3	CO1
24	What are economic relationships, and how are they represented in economics?	L1	CO1
25	How can input-output tables be used to analyses inter-industry economic relationships?	L2	CO1
26	What is market structure? Write different types of market structures	L1	CO3
27	What are the characteristics of perfect competition?	L1	CO3

28	What are the assumptions of the ordinal approach to consumer behaviour?	L1	CO2
29	Define the Indifference curve and budget line.	L1	CO2
30	Explain the concept of consumer equilibrium according to the Indifference curve approach.	L2	CO2
31	Explain how the point of consumer equilibrium is determined using indifference curves and the budget line.	L2	CO2
32	What is the Income Consumption Curve (ICC)?	L1	CO2
33	What is the relation between average and marginal cost?	L2	CO3
34	What are the properties of the Indifference curve?	L1	CO2
35	What are the two conditions of consumer equilibrium in the Indifference curve approach?	L1	CO2
36	What do you know about fixed and variable factors of production?	L1	CO3
37	What are the three basic decisions a producer must make for profit maximisation?	L1	CO3
38	What is a break-even point in the production process?	L1	CO3
39	How are the marginal cost and average total cost curves related?	L2	CO3
40	What are the fixed cost and variable costs?	L1	CO3

41	What are the differences between a firm's short-run and long-run costs?	L2	CO3
42	Explain the lower and higher break-even points in the production process	L2	CO3
43	Why is the long-run average cost curve ‘U' shaped?	L2	CO3
44	Explain how an increase in income influences a consumer's equilibrium concerning indifference curves and budget lines.	L3	CO2
45	What do you know about the Price Consumption Curve (PCC)?	L1	CO2
46	Explain price and out determination under a perfectly competitive firm in the short-run.	L2	CO2
47	How does a perfectly competitive firm determine piece and output in the long run?	L2	CO3
48	The chapter defines private enterprise as a characteristic of market-oriented economies. What would public enterprise be? Hint: It is a characteristic of command economies.	L1	CO3
49	Why might Belgium, France, Italy, and Sweden have a higher export-to-GDP ratio than the United States?	L2	CO4
50	Give the three reasons why the division of labour increases an economy's production level.	L2	CO3
51	What are three reasons to study economics?	L2	CO1
52	What is the difference between microeconomics and macroeconomics?	L1	CO1
53	What are examples of individual economic agents?	L1	CO3

54	What are the three main goals of macroeconomics?	L1	CO4
55	How did John Maynard Keynes define economics?	L2	CO1
56	Are households primarily buyers or sellers in the goods and services market? In the labour market?	L2	CO2
57	Are firms primarily buyers or sellers in the goods and services market? In the labor market?	L1	CO2
58	What are the three ways that societies can organize themselves economically?	L1	CO1
59	What is globalization? How might it have affected the economy over the past decade?	L2	CO4
60	Suppose you have a team of two workers: one is a baker, and one is a chef. Explain why the kitchen can produce more meals in a given period of time if each worker specialises in what they do best than if each worker tries to do everything from appetizers to desserts.	L2	CO1
61	Why would division of labour without trade not work?	L2	CO1
62	Can you think of any examples of free goods- goods or services that are not scarce?	L1	CO1
63	A balanced federal budget and a balance of trade are secondary goals of macroeconomics, while growth in the standard of living (for example) is a primary goal. Why do you think that is so?	L1	CO4
64	Macroeconomics is an aggregate of what happens at the microeconomic level. Would it be possible for what happens at the macro level to differ from how economic agents would react to some stimulus at the micro level? Hint: Think about the behaviour of crowds.	L1	CO4
65	Suppose, as an economist, you are asked to analyse an issue unlike anything you have ever done before. Also, suppose you do not have a specific model for analysing that issue. What should you do? Hint: What would a carpenter do in a similar situation?	L2	CO1
66	Why do you think that most modern countries' economies are a mix of command and market types?	L1	CO1

67	Can you think of ways that globalization has helped you economically? Can you think of ways that it has not?	L2	CO4
68	What are the main components of measuring GDP?	L1	CO4
69	What are the main components of measuring GDP with what is produced?	L2	CO4
70	Would you usually expect GDP as measured by what is demanded to be greater than GDP measured by what is supplied, or the reverse?	L2	CO4
71	Why must you avoid double counting when measuring GDP?	L1	CO4
72	What is the difference between a series of economic data over time measured in nominal terms versus the same data series over time measured in real terms?	L1	CO4
73	How do you convert a series of nominal economic data over time to real terms?	L1	CO4
74	What are typical GDP patterns for a high-income economy like the United States in the long run and the short run?	L2	CO4
75	What are the two main difficulties that arise when comparing different countries' GDPs?	L2	CO4
76	List some reasons economists should not consider GDP an effective measure of the standard of living in a country.	L1	CO4
77	Why do you think that GDP does not grow at a steady rate but rather speeds up and slows down?	L1	CO4
78	If the price of a product increases from ₹100 to ₹120, and the quantity demanded decreases from 500 units to 400 units, what is the price elasticity of demand?	L2	CO1
79	A product's price increases from ₹50 to ₹60, and the quantity supplied increases from 200 units to 280 units. What is the price elasticity of supply?	L2	CO1

80	A 5% decrease in the price of a commodity leads to a 10% increase in its quantity demanded. What is the price elasticity of demand?	L2	CO1
81	A consumer has ₹90,000 to allocate between books (₹1,500 each) and magazines (₹500 each). If the price of books falls to ₹1,200 each, illustrate how the budget line shifts and determine the new consumer equilibrium with an indifference curve analysis.	L3	CO2
82	A consumer has ₹80,000 to spend on coffee (₹200 per cup) and pastries (₹100 each). If the price of coffee increases to ₹250 per cup, explain how the budget line changes and describe the adjustment in the consumer's equilibrium using an indifference curve diagram.	L3	CO2
83	A consumer has ₹75,000 to spend on dining out (₹2,500 per meal) and movies (₹500 per ticket). If the price of dining out falls to ₹2,000 per meal, depict the shift in the budget line and determine the new consumer equilibrium through an indifference curve analysis.	L3	CO2
84	A consumer has ₹50,000 to allocate between video games (₹5,000 each) and snacks (₹200 each). If the price of video games rises to ₹6,000 each, illustrate the change in the budget constraint and determine the new consumer equilibrium using an indifference curve approach.	L3	CO2
85	A consumer has ₹60,000 to allocate between concert tickets (₹3,000 each) and streaming subscriptions (₹1,000 each). If the price of concert tickets increases to ₹3,500 each, analyze how the budget line shifts and determine the new consumer equilibrium with an indifference curve analysis.	L3	CO2
86	A consumer has ₹90,000 to spend on laptops (₹30,000 each) and accessories (₹3,000 each). If the price of laptops drops to ₹25,000 each, illustrate the shift in the budget constraint and determine the new consumer equilibrium using an indifference curve analysis.	L3	CO2
